DETAILED ACTION

The preliminary amendment filed 11 May 2006 has been entered. Claims 1-26 have been canceled and claims 27-47 have been added.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 27-43, drawn to an LDL binding protein.

Group II, claim(s) 44-45, drawn to a method for generating an antibody.

Group III, claim(s) 46-47, drawn to an antibody.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of Group I is the amino acid sequence of SEQ ID NO:1 or 3. The method of Group II does not include this special technical feature as it is a method of making an antibody with no defined structure. Likewise, the antibody/polypeptide of Group III has no structure as it is an antibody/polypeptide made by the generic method of Group II. Therefore, the special technical feature of Group I is not shared by Groups II and III and the inventions lack unity of invention.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
